

Did you know that you can get the flu vaccine along with other recommended vaccines during the same visit, depending on availability? Talk to your healthcare provider about which vaccines you can check off your list.

### ✓ Flu vaccine and an updated COVID-19 vaccine

Recommended for everyone 6 months and older.

### ✓ Flu vaccine and pneumococcal pneumonia vaccine

Recommended for children younger than 5 years old, people 5-64 years old with certain risk conditions, and adults 65 years and older.

### ✓ Flu vaccine and RSV vaccine

Recommended for adults 75 years and older and adults 60-74 years old at increased risk for severe RSV.

Additionally, people who are pregnant should talk to their healthcare provider about RSV immunization options to help protect their newborn.

## Benefits of Getting More Than One Vaccine in the Same Visit

Increase protection against infectious respiratory illnesses.

Reduce risk of severe infectious respiratory illness.

Save time by having less trips to vaccination locations.

Help prevent spreading infectious respiratory diseases to others.
